CONSERVATION AND MAINTENANCE

Furniture should be placed in areas with stable temperatures between 15-35 degrees Celcius and a humidity of 40 - 60%. Extreme changes in temperature and or humidity have a direct influence on the behaviour of material. Wood, being a natural (living) element, dilates or contracts, (absorbs or releases moisture).

The parameter changes mentioned depend directly on the location of the furniture in the customer's home or improper storage.

BD cannot be held responsible for constructive alterations caused by extreme changes as detailed above.

As for maintenance, only a natural wax product with a cotton cloth, or wiping the surface gently with a dry cotton cloth should be used.
Do not use abrasive products or solvents.

CLEANING AND MAINTENANCE

The WOOD should be cleaned with a damp cloth and or with neutral soap. Do not use cleaning products containing alcohol, solvents or any of their derivatives. BD recommends applying teak oil twice a year for good wood maintenance. Always apply the teak oil with a brush when the wood is dry. It is recommended to cover the sun lounger with a cover in rainy and out-of-use seasons. FABRICS should be cleaned with a damp cloth and or with a neutral soap. In case of difficult stains, a mixture of bleach (40%) and water (60%) can be applied.

CLEANING AND MAINTENANCE

DON'T

- . Avoid direct light.
- . Avoid sharp objects.
- . Keep away from direct heat.
- . Do not use household cleaners.
- . Do not rub.

DO

- . Dust regularly with a soft and dry cloth.
- . Clean with a slightly damp cloth and mild soap. Dry immediately after treatment.
- . Use a light circular motion working toward the center of the stain.
- . To Moisturize the leather we recommend to apply natural neutral creams.

CHARACTERISTICS

The natural characteristics of leather makes this product uneven as of all products that come from nature. Correcting processes make the leathers surface texture even and consequentially less natural. Grain changes, marks and scars caused during the life of an animal are attributes of fine quality and unaltered leather. Wrinkles, bites or other imperfections cannot be considered as defects in leather, but proof of its high quality.

The wrinkles on the surface are part of the original design. Both the number and size of the wrinkles can vary as natural leathers are being used. The elasticity itself enhances the diversity and variability of the wrinkles.

CLEANING AND MAINTENANCE

Furniture pieces should be placed in areas with stable temperatures and humidity. Only suitable for indoor use. It is recommended that items be placed in areas with no direct exposure to air conditioners, heat or sunlight.

Rub gently with a dry cotton cloth or with a natural wax product. Solvents and abrasive detergents should especially be avoided.

BD recommends using a damp cloth using only water. For oily, greasy stains (finger prints) we recommend using a sponge with water and a neutral detergent, and afterwards finishing off with a water dampened cloth. Using detergents containing solvents and or pure ethyl alcohol should be avoided.

As these are natural colours and tones, there may be some differences. Clear woods always tend to darken with time but this also depends on the direct exposure to light.
