Every day thousands of LZF lamps are switched on around the world

LZF is a story of people, wood and light and the result of a peculiar encounter between two strangers. When they met, they both loved their hands and what they were capable of doing with them. Both shared a passion for the arts, for ideas, and experimenting. They coincided in their way of living and their very distinct view of the world. With an absolute belief that everything you feel can be materialised, they began to experiment. Till one night, playing with some wood veneers, they managed to envelop light. LZF was born.

It was in 1993 when these two strangers met. She was a painter, arriving back in Spain having left New York: her name was Mariví Calvo. He was an Australian musician discovering Spain: his name was Sandro Tothill. Strangers have the ability to alter our lives and it is on that day they cease to be strangers. These things do not happen every day. These were the days during which they began to sketch the essence of what is now the atmosphere of LZF.

Wood is a the noble and natural part of LZF lamps. It is all FSC certified, ensuring its origin from controlled forests and guaranteeing its sustainability and environmental commitment.

LZF lamps' wood veneers are treated with Timberlite®, a technique patented by LZF that allow this fragile material to become flexible and resistant without the need of any chemical processes.

LZF spreads its passion for lighting and today more than a dozen multifaceted designers from around the world have already designed an LZF lamp.

Today, LZF is an international brand recognised for its details and its clear and differentiated image. LZF designs experiences through the use of light, where people and spaces mix, creating their own unique atmosphere. Designers, craftspersons, engineers, architects, consultants and interior designers make up the internal engine behind the creation of these experiences, guaranteeing that each one has its own unique personality.

Their lamps illuminate thousands of spaces and accompany millions of people. Each of these lamps is made by hand, with the same passion of enveloping the light that Marivi and Sandro began with on that afternoon so many years ago.

The book that you hold in your hands collects the thoughts, aesthetics and discoveries cultivated throughout LZF's many years. We invite you to know their stories and through them, to share their vision of life.

Welcome.

Photographic reproductions of our veneers can only be taken as a guideline to the actual colour of the veneers. Please use real colour swatches for tone matching as the wood's colour changes dramatically depending on the light source and the colour temperature of the bulbs. LZF will not accept any returns based on selections made using photographic reproductions.

Recommendations:

Avoid direct sunlight or strong indirect sunlight on the fixture. Exposure to the sun can change the colour of the wood over time. Please read all our instructions and recommendations on the use and care of our fixtures.

WOOD SHADE FINISHES

Timberlite[®]

The dramatic effect of light passing through the wood veneer is the essence and hallmark of LZF. This important feature would not be possible without the application of our patented process in treating the raw natural veneer: the Timberlite[®] system.

This system, the result of LZF's research & development work, allows us to work with an extremely flexible, yet very resistant veneer, which can take on many shapes without breaking. In addition to all our veneers being FSC certified, thanks to the treatment, the wood used to fabricate our lamps maintains its natural qualities, adopting different nuances and hues over time.

Wood touched by Light

Every LZF lamp is assembled by hand at LZF's manufacturing facility in Chiva, Spain; every piece is unique. The little differences become part of the charm; a rare commodity in a world of mass produced ubiquity.
